

LF182 XL Dragonfly

Creative Paradise Inc.

The following instructions accompany a video tutorial.

[Click here to watch the video!](#)

Materials: [LF182 Creative Paradise, Inc mold.](#)

COE96 Frit assortments: F1 Frit, F2 Frit, F3 Frit, CBS Cool Lava on Clear Dichroic Glass, Mosaic Nippers, Powder Sifter, Spatula, Ear Wax Vacuum, Respirator mask.

Spray your mold with a suitable glass separator before each. We recommend ZYP.

Always wear a respirator mask when using powder frits.

Fill Weight: 550 grams

Brief description following the video:

1. Place F1 Moss Green Powder into the head and tail of the Dragonfly
2. Back the Moss Green with F1 Yellow Opal
3. Place F1 Turquoise from tail to head in the body of the Dragonfly
4. Press and sweep (lightly) some F1 Turquoise Blue in the veins
5. Use a powder sifter to sift F1 Turquoise Blue into the borders of the wings
6. Sprinkle some F1 Ming Green in the center of the wings (optional)
7. Place F2 Pastel Green into the body of the Dragonfly, but do not fill the body up
8. Place a thin layer of F2 or F3 Clear into the wings but do not fill the wings
9. Using mosaic nippers, nip some Dichro glass pieces and place them in the wings
10. Fill up the mold cavity with F2 or F3 Clear Frit until the mold weighs 550 grams

Firing Schedule:

Segment	Rate	Temp	Hold
1	275	1150	45
2	50	1300	30
3	350	1460	10
4	9999	950	90
